Q. Recommendations to improve redemption & retention.

Answer:

1. Improve Redemption

- Offer easy rewards (discount coupons, free delivery).
- Reduce points required.

2. Increase Retention

- Give bonus points for frequent buyers.
- Personalized offers.

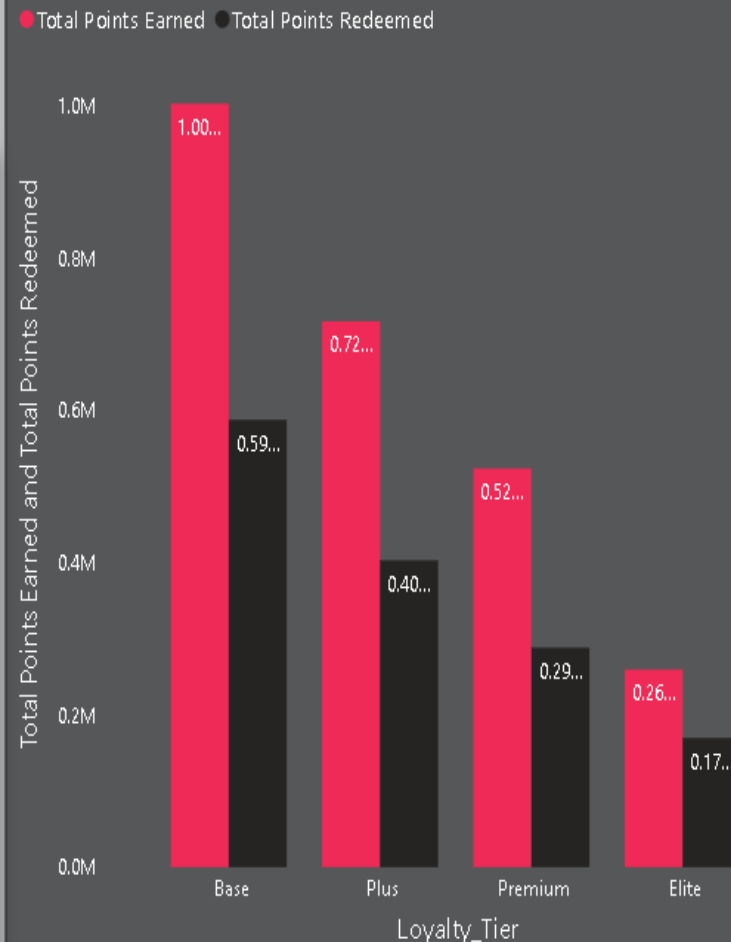

3. Optimize Promotions

- Avoid too many discounts.
- Use targeted promotions.

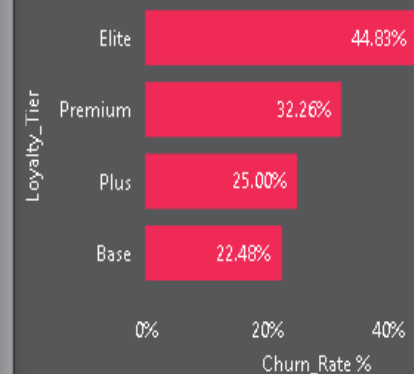

4. Upgrade Loyalty Program

- Add tier benefits (Gold, Platinum perks)

Top 3 recommendations for Adidas:

Q1. Which customers to prioritize for retention?

Ans:- Customers with high CLV and high days since last purchase should be prioritized for retention, as they contribute significantly to revenue but are at high risk of churn. Medium CLV customers with increasing inactivity should also be targeted to prevent future churn. Loyal high-value customers should be maintained through premium benefits.

Q2. Which channels are underperforming?

Churn_Rate % by Preferred_Channel

Underperforming channels are those with low average transaction value and high churn rate—typically the online/app channels compared to physical stores (based on your analysis).

Q3. How to strengthen loyalty program engagement?

Ans:- To strengthen loyalty program engagement:

- Offer **easier and more valuable rewards** (lower redemption thresholds)
- Give **personalized offers** based on customer behavior
- Introduce **tier-based benefits** (exclusive perks for higher tiers)
- Provide **bonus points & limited-time campaigns**
- Send **reminders and notifications** for unused points
- Enable **simple and quick redemption process**
